

energy saver

it all starts at (your!) home

Sign up your household
and raise funds for your
local community group

Your household can help raise much needed funds for local community groups within the Melbourne and Yarra council areas. All you have to do is sign up with your local community group to receive energy efficient light globes and water saving showerheads installed completely free in your home!

energy saver – it all starts at home is a community initiative run by the City of Melbourne and City of Yarra. In conjunction with these councils, ecovantage is helping you to help local community groups raise funds by installing energy efficient light globes and water efficient showerheads in your home, replacing your old inefficient products.

For every light globe and showerhead installed, **ecovantage** will donate 20c to your nominated community group. Insulation, draught sealing, efficient heating and solar hot water are also offered at discounted rates and funds will be allocated to your chosen community group through the installation of any of these energy saving products.

If you do not have a preferred community group, ecovantage will provide a list of community groups for you to choose from, and allocate funds accordingly.

The fundraising program will also help the environment and boost local employment. Community members who need a hand, and the locally unemployed receive training and subsequent contracting employment to install your products.

Are all households in Melbourne and Yarra eligible?

ecovantage operates **energy saver – it all starts at home** in Clifton Hill, Fairfield, Alphington, Fitzroy North, Carlton North/Princes Hill, Parkville and Kensington. Your household is eligible only if you have not already received energy efficient light globes and water saving showerheads from another company.

How does my household sign up?

Simply sign up with your local community group – they will have a list for you to register your name and contact details. Community groups must register through **ecovantage**. **ecovantage** will then contact you to make a date and time to complete your energy efficiency retrofit.

About ecovantage

ecovantage is an environmental consultancy dedicated to helping people and businesses become active in the fight against climate change. Contact us on **03 9662 9522** or visit **www.ecovantage.com.au** for more information.
